TECHNICAL SKILLS

Languages & Frameworks: JavaScript, React, Redux, HTML, CSS/Sass/SCSS/LESS, TypeScript, Ruby on Rails, Python

Databases: MongoDB, MySQL, PostgreSQL

Other Technologies: Node.js, Express, Git, Babel, Webpack, jQuery, Storybook, Figma, Balsamiq, Styled Components, Firebase, Bitbucket, Freshdesk, Clickup, Gatsby, Docker, AWS (EC2, S3), NGINX

PROFESSIONAL EXPERIENCE

SHELTERTECH

San Francisco, CA

Software Engineer

Oct 2020 - April 2021, Jan 2025 - Current

- Built and maintained **full-stack features** for ShelterTech products, including the **Service Guide, DARCY, and the main ShelterTech website**, using **React, TypeScript, Gatsby, HTML/CSS/SCSS** to deliver **responsive, interactive UI** and **user experiences**.
- Developed and integrated **RESTful APIs in Ruby on Rails**, connecting the frontend to **DARCY's backend database** to power dynamic features such as **service search, filtering, and real-time updates** for **shelters, food programs, and healthcare resources**.
- Collaborated with **frontend and backend teams** to **optimize data flow, improve maintainability**, and ensure **reliable delivery of dynamic service information** to users.

CIONIC

San Francisco, CA

Software Engineer

Oct 2022 - Jan 2025

- Led **full-stack development** for the **company website** and internal tools, modernizing the legacy codebase (**JavaScript, jQuery, CSS**) with **React and TypeScript** to improve **performance, maintainability, and developer efficiency**. Designed and implemented the **Python backend**, including **API endpoints** and **database classes**, enabling **dynamic data flow** and a seamless **user experience** across platforms.
- Partnered with **design and marketing teams** to enhance **website functionality**, expand content, and integrate **analytics**, driving a **50% increase in traffic** and **80% growth in new customer sign-ups**.
- Developed and executed **automated tests** to validate **API responses**, significantly reducing **data errors** and improving overall **data accuracy and reliability**.
- Ensured seamless integration of **key website pages**, including **customer assessment** and **sleeve purchasing**, with the **gateway application**, delivering **fully responsive and flawless functionality** across all devices.

PLUTOSHIFT

Palo Alto, CA

Frontend Software Engineer

Apr 2021 - Nov 2021

- Designed **wireframes and prototypes** using **Balsamiq and Figma** to meet stakeholder use cases, driving a **60% increase in customer engagement**.
- Developed a **KPI and data reporting platform** with **React, Redux, and Hooks**, using **forms, modals, drop-downs, cards, and Plotly.js** to visualize **real-time industrial performance**, enabling stakeholders to make **data-driven decisions** quickly.
- Collaborated with **backend and data science teams** to design custom **schemas, create API endpoints**, and deploy platforms to customers, ensuring seamless integration of frontend and backend systems.
- Executed **Agile software development** using **Shortcut (Clubhouse), Storybook, Git workflow, testing, and code reviews**, improving team efficiency and delivering high-quality outputs.

EDUCATION

HACK REACTOR

San Francisco, CA

Advanced Software Engineering Immersive Program

2019

UNIVERSITY OF CALIFORNIA, BERKELEY

Berkeley, CA

Certificate of Accounting

2015

UNIVERSITY OF CALIFORNIA, DAVIS

Davis, CA

B.A. Asian American Studies

2007 – 2012
